-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**DETAILED ACTION**

***Election/Restrictions***

1. Applicant's election with traverse of Group I in the reply filed on 3/14/05 is acknowledged. The traversal is on the ground(s) that the search for the elected invention would include a search of the non-elected invention. This is not found persuasive because the search for the elected invention would not include areas in the process art of class 264.

The requirement is still deemed proper and is therefore made FINAL.

***Claim Objections***

2. Claim 2 is objected to because of the following informalities: the spelling of polypropylene is incorrect. Appropriate correction is required.

***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1-8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hauser 6,761,954. The reference discloses the invention substantially as claimed, namely a weather strip for a car comprising a U-shaped grip including holder part made of thermoplastic material and an insert made of fiberglass or thermoplastic rubber; see the Figures, column 5, lines 1-3 and 40-43, and column 7, lines 1-3. However, there is no teaching of a seal part on the weather strip. The reference also discloses that it is

Art Unit: 1772

well-known in the art to provide sealing members on U-shaped weather strips; see column 1, lines 44-50. It would have been obvious to one of ordinary skill in the art to provide a seal member on the weather strip of the reference in order to provide a seal between a moveable component and the weather strip. Concerning claims 2-8, it would have been obvious to one of ordinary skill in the art to use any well-known materials and adjust their properties to provide optimum properties for a particular end use.
